

SHREYANSH SHUKLA

Full-Stack Developer — GenAI Engineer — AI Agents

Phone: +91-8308343934 Email: shuklashreyansh0207@gmail.com
GitHub: github.com/shreyansh0207 LinkedIn: linkedin.com/in/shreyansh-shukla

PROFESSIONAL SUMMARY

Full-Stack Developer and GenAI Engineer focused on building production-grade AI applications and autonomous AI agents using React, TypeScript, Node.js, Python, PostgreSQL, and modern LLM tooling. Hands-on experience with LLMs, RAG, vector databases, AI agent frameworks (Google ADK), and n8n workflow orchestration. Experienced in Agile development, REST API design, Docker, and cloud deployment.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

2022–2026

Jaypee University of Engineering and Technology

CGPA: 7.5

Higher Secondary Education

P R Pote Patil International School, Amravati, Maharashtra

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++	gineering, Groq API, Google ADK
Frontend: React.js, Next.js, HTML, CSS	AI Automation: n8n, AI Workflows, API Automation,
Backend: Node.js, Express.js, FastAPI, REST APIs	LLM Workflow Orchestration
Databases: PostgreSQL, MongoDB, Prisma, pgvector	DevOps: Docker, Container
GenAI: LLMs, RAG, Embeddings, AI Agents, Prompt En-	Tools: Postman, Figma

PROFESSIONAL EXPERIENCE

Full Stack Engineering Intern

May 2025 – July 2025

RapidClaims.ai – Healthcare & SaaS Startup — Remote

- Built and optimized full-stack features using the MERN stack, improving workflow efficiency by 30 percent.
- Developed and integrated REST APIs supporting core application features and frontend workflows.
- Collaborated with 8+ stakeholders to translate product requirements into 25+ user stories.
- Participated in 15+ sprint planning meetings within a cross-functional Agile engineering team.
- Tested and debugged features across 20+ users, documenting 40+ test cases with 95 percent resolution.

Analyst

SkipperX – Startup — Bangalore, India

- Built Power BI dashboards to track growth metrics and lead-sourcing performance.
- Wrote SQL queries to extract, clean, and analyze data from company databases.
- Researched market and industry trends to identify business growth opportunities.

PROJECTS

ARIA – AI-Powered Personalized Learning Platform *Next.js, TypeScript, Node.js, PostgreSQL, pgvector, GenAI*

- Designed an adaptive AI tutor platform providing personalized reading, writing, and mathematics learning experiences.
- Built long-term student memory using pgvector to enable context-aware and personalized AI responses.
- Integrated Groq API for real-time AI tutor conversations and adaptive quiz generation.
- Developed Student, Parent, and Teacher dashboards with progress tracking and analytics.
- Implemented gamification features including XP, badges, and streaks to improve student engagement.

Mental Health Support Platform – AI-Powered Wellness Platform

React.js, Node.js, MongoDB, GenAI

- Built a full-stack AI-powered platform supporting mental health resources and community wellness features.
- Developed AI-driven conversational support flows to guide users toward relevant resources and coping strategies.
- Designed community and resource-discovery features to improve accessibility of mental health support.
- Implemented secure, privacy-conscious data handling for sensitive user interactions.

Weather Agent – Autonomous AI Agent

Python, Google ADK, Google API, TypeScript

- Built an autonomous AI agent using Google’s Agent Development Kit (ADK) to fetch and reason over live weather data via tool-calling.
- Integrated Google APIs to retrieve real-time weather and location data, exposing results through structured agent responses.
- Designed a TypeScript-based interface layer for interacting with the agent’s outputs.
- Implemented multi-step reasoning so the agent can answer natural-language weather queries beyond simple lookups.

CERTIFICATIONS & ACHIEVEMENTS

- | | | |
|----------------------|---------------------------|--------------------------|
| • Power BI (Infosys) | • Web Development (Udemy) | • Solving for India |
| • Postman API | • ByteRunners (IIT Delhi) | • LeetCode 300+ Problems |
